

Ex-Mail™

Hosted Email Services for the SMB

Ex-Mail lets you deliver hosted Exchange-like email services to your SMB customers at less than 50% of the cost of MS Exchange. Managed via AlphaControl, Ex-Mail enables you to provide hosted domain services, while letting you generate high-margin monthly revenue.

Why Ex-Mail?

Centrally Managed

Manage your customers' hosted domain services using the same, familiar platform used to manage the rest of their network, enhancing service levels and ease of use while reducing maintenance.

SaaS offering boosts your recurring revenues

Extend and differentiate your service portfolio with hosted Exchange-like email services, earn recurring monthly revenues and acquire new customers with attractive SaaS offerings.

Key Features

Centrally Managed and Fully Integrated with AlphaControl

View and access all your customer domains from a single unified platform with AlphaControl's easy-to-use GUI console. Remote management of Exchange-like services using Atera's in-the-cloud email servers reduces your total cost of ownership.

Anywhere, Anytime Web Access

Work and collaborate anytime, anywhere with full web access to all Outlook functions using Internet Explorer or Firefox. Web access functionality includes email, calendar sharing, contacts, tasks, and shared/public folders.

Multiple Desktop Client Support

Based on the MAPI standard, Ex-Mail supports all major desktop email clients and enables Outlook sharing across all versions (2000 to 2007), as well as supporting IMAP and iCal clients.

Remote Mobile Phone Synchronization

Ex-Mail supports a wide range of mobile email clients with complete remote synchronization for all ActiveSync compatible PDA's and phones (e.g., Windows Mobile, iPhone, Nokia Mail for Exchange, Google Android).
