

Mail Archiving™ Automated "In the Cloud" Email Archiving

The Mail Archiving service enables you to provide SMB customers with secure and automated archiving and monitoring of all incoming and outgoing email. Easily managed from AlphaControl, this subscription-based service enables 7-year remote storage of email data, while letting you generate monthly revenue.

Why Mail Archiving?

Centrally Managed

Manage your customers' email archiving needs using the same, familiar platform used to manage the rest of their network, enhancing service levels and ease of use while reducing maintenance.

SaaS offering boosts your recurring revenues

Extend and differentiate your service portfolio with automated, cloud-based email archiving, earn recurring monthly revenues and acquire new customers with attractive SaaS offerings.

Key Features

Centrally Managed and Fully Integrated with AlphaControl

View and access all your customer domains with a single click using the intuitive and familiar AlphaControl GUI.

Bi-directional Email Tracking

Monitor and track all incoming and outgoing emails in a completely automated and transparent manner.

Fast Search & Retrieval

Powerful search and retrieve capabilities allow you to quickly scan archived emails and restore those that meet your search requirements.

7-Year Data Storage in the Cloud

Archive all incoming and outgoing email data for up to 7 years on Atera's storage servers at no additional cost.

Military-Strength Security

Robust security features, include 128 bit AES encryption, ensures the privacy and integrity of your customers' valuable business data.
