

## MailShield™

### Hosted Spam and Email Security Solution for SMBs

MailShield™ offers your SMB customers an enterprise-grade anti-spam and email security solution. Easily managed from your AlphaControl platform, this subscription-based service transparently keeps spam and email-borne viruses from entering your customers' networks, while letting you earn recurring monthly revenues.

## Why MailShield?

### Centrally Managed

Manage your customers' email security needs using the same, familiar platform used to manage the rest of their network, enhancing service levels and productivity while reducing maintenance.

### SaaS

### SaaS offering boosts your recurring revenues

Extend and differentiate your service portfolio with cloud-based email security, earn recurring monthly revenues and acquire new customers with attractive SaaS offerings.

## Key Features

### Centrally Managed and Fully Integrated with AlphaControl

View and access all your customer domains with a single click using the familiar AlphaControl GUI.

### Multiple Anti Virus Engines

Multi-engine heuristic filtering and automatic updates every 2 minutes provide customers with reliable, up-to-date virus protection.

### 99% Spam Filtering

MailShield achieves 99% spam filtering accuracy, blocking spam in real time for increased productivity and huge bandwidth and storage savings.

### LDAP Synchronization

LDAP-based synchronization with Active Directory automatically updates MailShield each time the customer adds a new email account to its domain.

### Comprehensive Monitoring and Reporting

Comprehensive reports and statistics help you analyze the amount and type of spam and viruses attacking the system.

### 7-Day Full Backup

Should your customer's mail server crash, MailShield backs up all emails for up to seven days to ensure business continuity.
