

WebShield™

Real-Time Cloud-Based Web Security for SMBs

WebShield™ is a comprehensive web security solution featuring cloud-based anti-virus, advanced Web 2.0 threat protection and dynamic URL filtering. Easily managed from your AlphaControl platform, Webshield mitigates security risks and boosts productivity for your SMB customers, while letting you earn recurring monthly revenues.

Why WebShield?

Centrally Managed

Manage your customers' web security needs from the cloud using the same familiar platform used to manage the rest of their network, while reducing hardware and software maintenance.

SaaS offering boosts your recurring revenues

Extend and differentiate your service portfolio with cloud-based web security, earn recurring monthly revenues and acquire new customers with attractive SaaS offerings.

Key Features

Centrally Managed and Fully Integrated with AlphaControl

Manage your customers' web security policies and view reports using the familiar AlphaControl GUI.

Anti-Virus & Anti-Spyware

Block viruses, spyware and emerging web threats by scanning web content in the cloud with near-zero latency.

Advanced Threat Protection

Make sure your users are safe from next generation threats such as malicious active content, botnets, cross site scripting, phishing, anonymizers and zero-day threats.

URL Filtering

Limit exposure to liability and enhance productivity via policy-based URL filtering that dynamically scans every object on every page.

Web 2.0 Controls

Take advantage of Facebook, YouTube and other Web 2.0 platforms to drive business without compromising productivity or security.

Real-Time Snapshots

Access and analyze all transaction data through real-time snapshots with multiple views and powerful interactive drilldown capabilities.
